Incandescent Lamps

In many countries, incandescent lamps remain the most popular lamps, especially in the home, where they act as the work-horse lighting source. Even in countries where incandescent lamps are no longer available for household illumination, types are available for special applications such as appliances, low voltages and rough service installations.

Oven

A family of "pygmy" shaped lamps intended for use in high temperature ovens.

Rough Service

A range of conventional shaped main voltage lamps designed for use where high vibration or physical shock are more common.

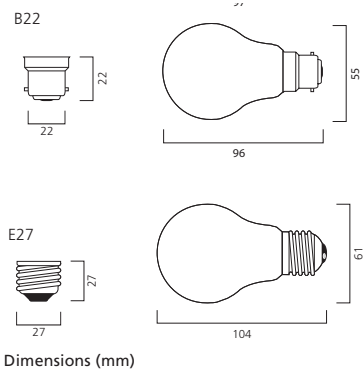

- “A” shaped incandescent lamp for operating on low voltage circuits
- Clear outer bulb
- Extended lifetime of 2500 hours for 25W and 40W versions
- Suitable for emergency lighting, machines, signs and signal panels

GLS Rough Service

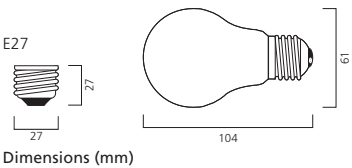

- Extra durable lamp resistant to vibrations
- Ideal for use in industrial and working environments like garages etc
- Available in pearl finish outer bulb
- Extended 1500 hours service life
- Intended for use in high vibration applications
